

## PROGRAMME

**Tuesday – February 26, 2002**

– Chair Zhanna Reznikova –

9:00            **Raimund Apfelbach, "Chemical Communication in Mammals: What We Know and What We Would Like to Know"**

10:00            **Zhanna Reznikova, "Use Ideas of Information Theory to Study Animal Communication: A New Tool to Find News"**

11:00–11:30            – *Coffee Break* –

11:30            **Adam Miklosi, "Some General Insights of Animal Communication From Studying Interspecific Communication"**

12:15            **Elena V. Konstantinova, "Applications of Information Theory in Chemical Graph Theory"**

13:00 –            – *Lunch* –  
14:30

14:30            **Vieri Benci, "Dynamical Systems and Data Compression"**

15:15            **Stefano Galatolo, "Algorithmic Information Content, Dynamical Systems and Weak Chaos"**

16:00 –            – *Coffee Break* –  
16:30
