

Kolloquium Mathematische Physik

Wintersemester 2012/13

Freitags, 12.10.2012, 16:15 Ort: Hörsaal 11

Daniel Tataru
UC Berkeley

Schrödinger maps

Schrödinger maps are a nonlinear geometric counterpart of the classical linear Schrödinger equation. In this talk I will introduce the equations, and I will present some recent ideas, results and open problems in the field.

Kaffee und Tee ab 15:30 Uhr in V3-201.
