

Schriftenverzeichnis

1. Über kompakte Gruppen, Dissertation, Berlin 1969.
2. Epimorphisms of compact groups are onto, Proc. Amer. Math. Soc. 26 (1970), 503–504.
3. A universal property of the Takahashi quasi-dual, Canad. Journal of Math. 24 (1972), 530–536.
4. Einige Eigenschaften des Darstellungsringes kompakter Gruppen, Math. Zeitschrift 130 (1973), 107–117.
5. The coproduct of two circles, General topology and its applications 6 (1975), 127–144.
6. Zwei Klassen lokalkompakter maximal fastperiodischer Gruppen, Monatshefte für Math. 81 (1976), 15–40.
7. Chu-Dualität und zwei Klassen maximal fastperiodischer Gruppen, Monatshefte für Math. 82 (1976), 31–50.
8. Decomposition of tensor products of irreducible unitary representations, Proc. Amer. Math. Soc. 52 (1975), 427–432.
9. Der Raum der primitiven Ideale von endlichen Erweiterungen lokalkompakter Gruppen, Archiv der Math. 28 (1977), 133–138.
10. Nilpotente Liesche Gruppen haben symmetrische Gruppenalgebren, Math. Annalen 227 (1977), 51–59.
11. Well-Bounded Semigroups in Connected Groups, Semigroup Forum 15 (1977), 159–167.
12. mit H. Leptin, Symmetry and nonsymmetry for locally compact groups, Journal of Functional Analysis 33 (1979), 119–134.
13. Nichtsymmetrische sechsdimensionale Liesche Gruppen, Journal Reine Angew. Math. 306 (1979), 154–176.
14. Symmetry (or simple modules) of some Banach algebras, Harmonic Analysis Iraklion 1978, Lecture Notes in Mathematics 781, Springer-Verlag, 177–193.
15. Symmetry and nonsymmetry for a class of exponential Lie groups, Journal Reine Angew. Math. 315 (1980), 127–138.

16. Discrete nilpotent groups have a T_1 primitive ideal space, *Studia math.* 71 (1982), 45–49.
17. Gewisse Segalsche Algebren auf lokalkompakten Gruppen, *Archiv der Math.* 33 (1979), 454–460.
18. Kunze–Stein phenomenon and L^p –estimates of matrix coefficients for a certain solvable Lie group, in *Operator Algebras und Group Representations*, Vol. II, Pitman, London 1983, 69–80.
19. Einfache Moduln über gewissen Banachschen Algebren: ein Imprimitivitätssatz, *Math. Annalen* 259 (1982), 245–258.
20. Operators of finite rank in unitary representations of exponential Lie groups, *Math. Annalen* 259 (1982), 371–383.
21. Simple quotients of group C^* –algebras for two step nilpotent groups and connected Lie groups, *Ann. Sci. École Norm. Sup.* 16 (1983), 151–172.
22. Algebraically irreducible representations of L^1 –algebras of exponential Lie groups, *Duke Math. Journal* 50 (1983), 1077–1106.
23. Über das Synthese–Problem für nilpotente Liesche Gruppen, *Math. Annalen* 269 (1984), 431–467.
24. Auflösbare Liesche Gruppen mit symmetrischen L^1 –Algebren, *Journal Reine Angew. Math.* 358 (1985), 20–42.
25. Spectral Synthesis of Orbits of Compact Groups, *Proceedings of the Centre for Mathematical Analysis*, Australian National University, Vol. 16 (1987), 247–261.
26. Invariant Cones in Solvable Lie Algebras, *Math. Zeitschrift* 210 (1992), 661–674.
27. The Theorem of Lie and Hyperplane Subalgebras of Lie Algebras, *Geometriae Dedicata* 43 (1992), 83–91.
28. An addendum to K.H. Hofmann’s article “A memo on the exponential function and regular points”, *Archiv der Math.* 59 (1992), 38–41.
29. Dense Lie Group Homomorphisms, *Journal of Algebra* 169 (1994), 625–647.
30. Unitary Representations of Lie Groups and Operators of Finite Rank, *Annals of Math.* 140 (1994), 503–556.
31. An Example of a Generalized Completely Continuous Representation of a Locally Compact Group, *Studia math.* 105, (1993) 189–205.
32. Rigidly symmetric L^1 –algebras of locally compact groups, *Seminar Sophus Lie 1992*, Vol. 2, 189–197.

33. mit A. Lüdeking, Cocycles on Abelian Groups and Primitive Ideals in Group C^* -Algebras of Two Step Nilpotent Groups and Connected Lie Groups, *Journal of Lie Theory* 4 (1994), 39–103.
34. The structure of twisted convolution C^* -algebras on abelian groups, *J. Operator Theory* 38 (1997), 3–18.
35. Fell's subgroup algebra for locally compact abelian groups and L^1 -covariance algebras, *Coll. math.* LXIX (1995), 239–265.
36. Unitary Representations of Diamond Groups, *Matematika Scand.* 85 (1999), 121–160.
37. Normalizers and centralizers of reductive subgroups of almost connected Lie groups, *J. Lie Theory* 8 (1998), 211–217.
38. Injectivity of the Harish Chandra transform via C^* -algebras, *Manuskript* 1998.
39. Banach algebras associated to Laplace operators on the Heisenberg group and on the affine group of the real line, in: *Operator Theoretical Methods* (Timișoara, 1998), Theta Found., București, 2000, 301–329.
40. mit K.H. Hofmann, S.A. Morris, The exponential function of locally connected compact abelian groups, *Forum Math.* 16 (2004), 1–16.
41. Spectral synthesis for orbits of compact groups in the dual of certain generalized L^1 -algebras, *Publications Centre Univ. Luxembourg* (2003), 121–141.
42. The dual of $L_K^1(N)$ for Heisenberg groups N and compact abelian K , *Proceedings of the VII International Workshop on 'Lie Theory and its Applications in Physics'*, (Varna 2007), Sofia, Heron Press 2008, p. 364–371.
43. Operator kernels for irreducible representations of exponential Lie groups, *Bull. Austr. Math. Soc.* 78 (2008), 301–316.
44. Banach algebras associated with Laplacians on solvable Lie groups and injectivity of the Harish Chandra transform, *Coll. Math.* 118 (2010), 283–298.
45. Wiener Theorems for $\mathcal{L}^p$ -spaces on general motion groups, erscheint in den *Proceedings des "International Meeting on Harmonic Analysis and PDE"*, Marrakesch (2009).
46. Synthesis properties of orbits in the dual of nilpotent Lie groups (vorläufige Fassung).
47. Wiener Theorem for $\mathcal{L}^p$ -spaces on general motion groups (vorläufige Fassung).
48. mit J. Ludwig und C. Molitor, Spectral synthesis for flat orbits in the dual space of weighted group algebras of nilpotent Lie groups, to appear in *Transactions of the AMS*.
