METHODOLOGY NOTES:

In order to allow comparisons over time and across journals, Yearly Prices have been converted to USD within the USD Price columns and are based on currency rates at the end of the preceding calendar year.

Price columns have been rounded up to the nearest currency value.

We report the institutional subscription charge for the smallest subscription package that includes the print edition. In many cases, some form of electronic access is also included.

If a free electronic journal provides a print edition, we give the price of the print edition

If there is a mandatory shipping and handling charge stated, that is included in the price we report.

We take as the last page in a volume the final page with actual text, whether a research paper, news or book reviews.

We ignore blank pages and backmatter such as author information, indexes and title pages for binding, whether numbered, unnumbered, or numbered separately.

nyr = not yet received or reported online (in some cases, only pageproofs have been received, not published issues with pricing information)

nyc = holdings not yet complete

nij = price not mentioned in the journal

^ = Data reflects an extra volume or supplement.

^^ = Prices given are for both journals together; only joint subscriptions are offered.

-- = the electronic version is free

e = only an electronic version is available of the GAMM-proceedings; pages reflected in the table are printed pages only
