Göttingen: 500? OCR?

Michigan: 1000 + OCR

# Where to go now?

some small steps

## 1 Coordination

Web site

Mailing list

projects

funding

partnerships

Databases

books  
journals  
theses

Mirror

# 2 Direction

International committee

suggest priorities

establish standards

coordinate/negotiate with

publishers

societies

libraries

granting agencies/  
foundations

3 Establish an international digitization project for math

Economics:

Cornell \$10,000/year  
(= 4% math acq budget)

100 partic pants  
→ \$1,000,000/year

What does it buy

$$\frac{1,000,000}{2} = 500,000 \frac{\text{pages}}{\text{year}}$$

for Cornell  $\frac{10,000}{500,000} = \$0.02/\text{page}$

# Current publication costs

Rehmann table in Bielefeld:

[www.mathematik.uni-bielefeld.de/~rehmann/BIB/](http://www.mathematik.uni-bielefeld.de/~rehmann/BIB/)

1999            246    major journals

323,786 pages

\$173,552

~ \$50/page

eg. JSTOR, ..

JFM ~ 60,000

Zb1 ~ 78,000

MR ~ 45,000

books, theses ~ 10,000

total ~ 100,000

develop methods + software to

- match data
- correct records
- allow other collections to be added easily

(computer assisted matching)

Why 1930-1950?

- complicated enough to be interesting
- small enough to be doable
- far enough away to avoid politics

# 5 Citation Database in Group Theory

- \* develop software tools
- \* determine most reliable + economical methods
- \* construct working example

Although This would be done in a specific field, the tools + methods should be easily exportable to other fields

- input raw data
  - tools to extract references from current Tex, dot, ps, pdf
  - scan, OCR, parse from "recent" paper
  - for "older" paper, something similar or by hand
- match raw data to
  - canonical entry in database or construct a new entry
  - JFM, EBI, MR review
  - list of online data
- identify (journals, author, ...)
- search
- display, including links

- bibliography of a paper
- papers citing
- reviews in JFM, Zbl, MR
- online version of original

Some tools exist:

- ps2text, prescript  
[www.netd.org/fast.cgi-bin/library](http://www.netd.org/fast.cgi-bin/library)

- Cite Seer  
[www.netd.org/homepages/lawrence/citeseer.html](http://www.netd.org/homepages/lawrence/citeseer.html)

How big is it ?

MR, Zbl + experts  $\Rightarrow$

$\sim$  50,000 items

@ 20 refs/item  $\rightarrow$  1,000,000 citations
